

Device Log Service

The power to optimise all your print and copy resources

Monitor your multifunction device usage on the cloud to achieve maximised savings and reduce print wastage.

Device Log Service is a cloud-based service that centrally manages your organisation's MFDs, giving you a holistic view on your spending with no further investment required for IT infrastructure or resources. This cost management solution helps you reduce your total cost of ownership and helps contribute toward environmental sustainability.

Managing Your Overhead

The way you use your Fuji Xerox Multi Function Devices (MFDs) can boost your organisation's savings and productivity. With no added administration or infrastructure; usage statistics when you want it, where you want it—this is Device Log Service.

Data Gathering – MFD usage data is automatically collected and stored on the Cloud.

Usage Tracking – usage information is gathered on individuals and groups.

Device Log Service tracks up to an incredible 100 MFDs via the Internet, all without additional equipment costs—that's Fuji Xerox service innovation in action.

Usage Monitoring Made Simple

By subscribing to this cloud-based service, efficiently manage MFD usage via your web browser.

User-friendly Display

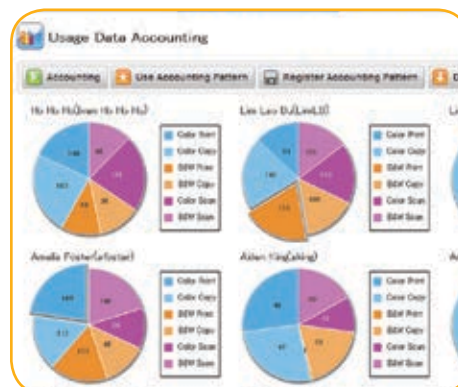

Automatically displays all your managed devices, a main report list, and a Function Toolbar for quickly navigating functions.

Usage Data Accounting

Customise an accounting template based on your selection criteria:

- Tally usage data on a user or device basis
- View results in your choice of pie, bar/column, line, or area chart
- Set unit prices for Colour and/or B&W formats to create a usage costings chart.

Register your preferred criteria to easily generate reports and charts.

Device Management

Switch between List and Detailed views on all your managed devices and adjust accounting settings to your preference.

User Management

Manage details of up to 2,000 users. Export data easily in CSV format.

Benefits of Device Log Service

Cost Savings

Costs are reduced when wastage is minimised.

Productivity

Spend more time on business critical matters rather than device monitoring and support.

Operational Efficiency

With usages tallied by device, pinpoint areas for growth at a glance.

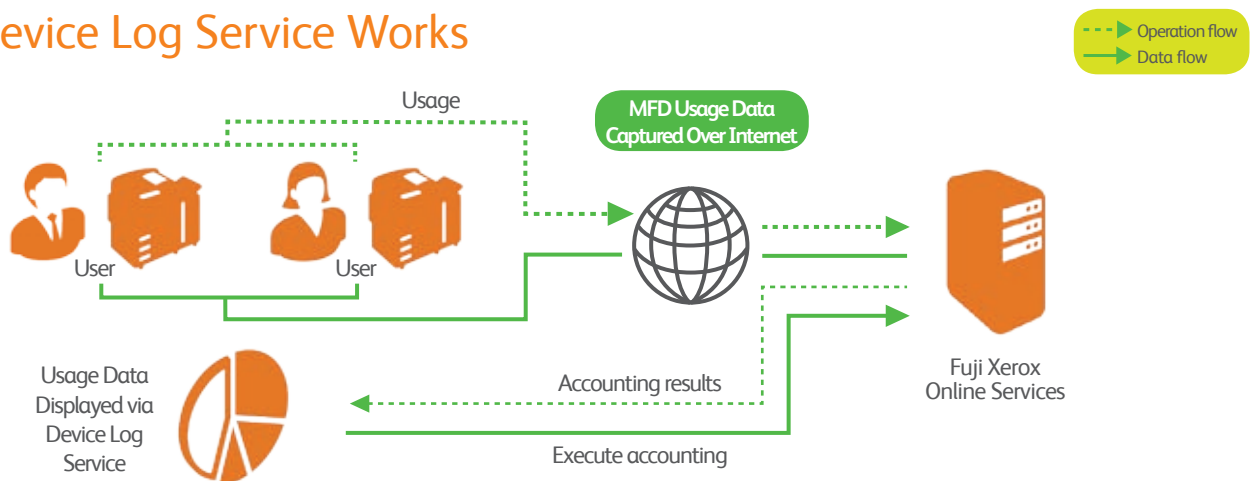

Sustainable. Stable. Secure.

Ideal for small to medium-scale businesses, Device Log Service captures MFD usage with no additional investment in software or hardware required. Simply by logging in via web browser, the cloud-based portal relays information regularly in your choice of chart style to your personal computer.

With device usage patterns at your fingertips, department resources are allocated accurately, wasteful habits are eliminated, green practices are put in place.

How Device Log Service Works

Effective Management. See how MFDs are used per department to maximise output with the least number of devices.

Major Specifications of Device Log Service

Key Specifications

Language	UI Language	English / Korean / Traditional Chinese / Japanese
User	Number of users	1999 Users on one Device Log Service Account
Administrator	Number of Admin	Up to 5 Administrators. Administrators need to have own Fuji Xerox Direct ID
Devices	Number of Devices	100 devices on one Device Log Service Account
Authentication	Authentication Method for MFD Method	Local Auditron Only EP-BB
Connection	Communication Path	SSL
Security	Detail	Please see Security White Paper
